

Next-Gen Retail & Distribution Operating System

End-to-End Enterprise Standard from Signup to Statutory Filing

[*] LIVE EVALUATION & DEMO CREDENTIALS

Production URL: <https://smartvyapar.vercel.app>

Demo Store Name: Ziona Tech & Electricals / Auto Spares

Username (Email): demo@smartvyapar.app

Password: SmartVyapar@2026

Default Role: Store Owner / Administrator (Full Access)

Statutory GSTIN: 32AAAAA0000A1Z5 (Kerala State Code: 32)

01 / SALES POS COUNTER & SILENT PRINTING

High-throughput retail counter with keyboard shortcuts, dynamic UPI QR, and offline failover.

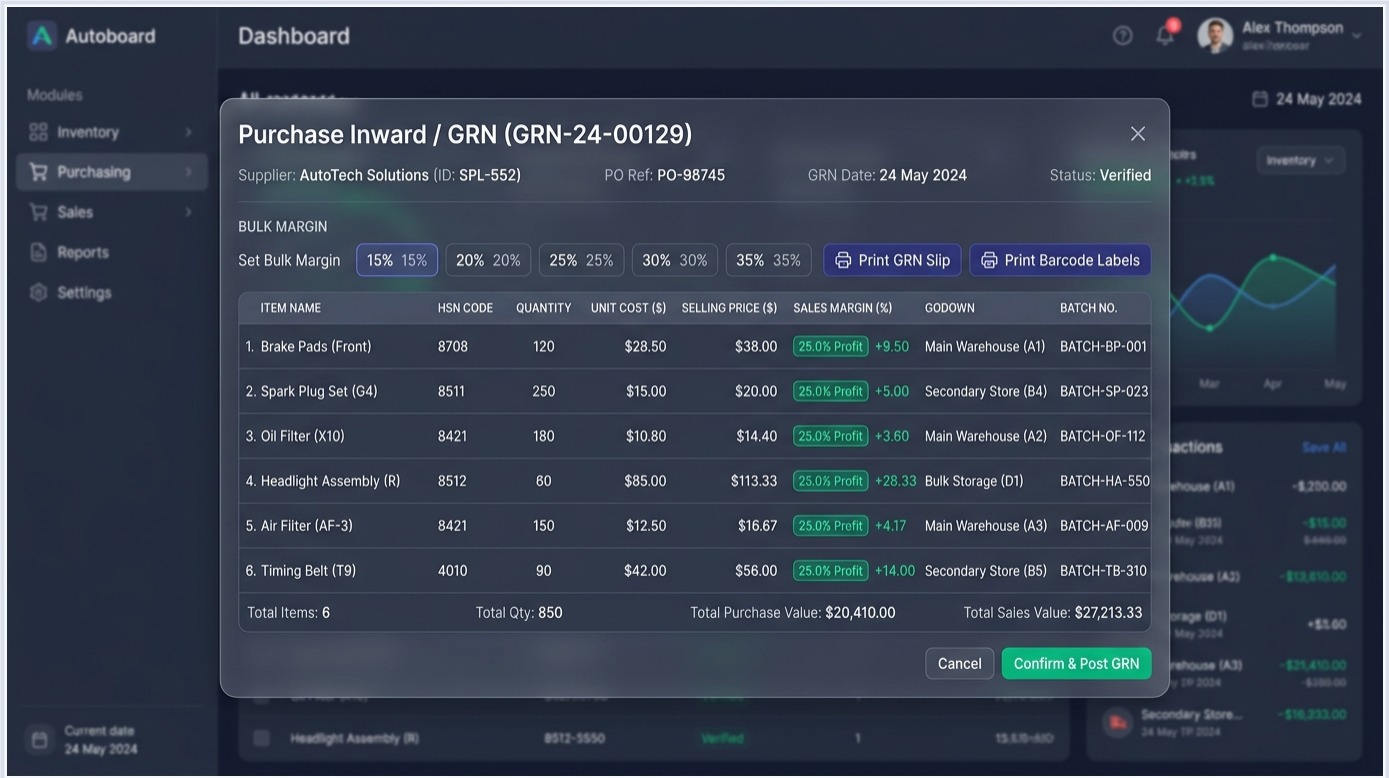

KEY POS COUNTER CAPABILITIES

- Keyboard-First Speed: Press F2 for barcode scan, Enter for next line, F4 for cash, F8 for UPI, F12 to save.
- Dynamic UPI QR Code: Prints an instant UPI QR on thermal receipts for scan-and-pay via GPay, PhonePe, Paytm.
- Split Tenders: Accept mixed payments (e.g., 50% Cash + 50% UPI, or Cash + Customer Khata Credit).
- Silent ESC/POS Direct Print: Built-in WebSerial hardware driver bypasses Windows print dialogs completely.
- Offline-First Mode: Native IndexedDB ensures cashiers keep billing during broadband blackouts with zero downtime.

02 / PURCHASE INWARD (GRN) & SALES MARGINS

World-standard voucher inward with bulk margin presets, godowns, and barcode printing.

INWARD WORKSPACE & MARGIN MANAGEMENT

- Bulk Margin Strategy Toolbar: 1-click presets (15%, 20%, 25%, 30%, 35%) to set profits across all incoming items.
- Bidirectional Margin Engine: Enter Cost & Selling Price to calculate Margin %, or type Margin % to set Price.
- Godown & Batch Allocation: Direct items to Main Warehouse, Front Shop, or Transit with Expiry and MRP.
- Official GRN Print Slip: Audit inward voucher with supplier bill reference, received quantities, and signatures.
- Code128 Barcode Sticker Printing: Instantly print thermal product labels for shelf display and fast checkout.
- AI Camera Bill Scanner: Snap photos of supplier paper bills with phone/tablet for Gemini Vision auto-fill.

03 / STATUTORY GST COMPLIANCE & GOVT FILING

100% CBIC & GSTN Portal schema compliance. GSTR-1, GSTR-3B, e-Invoice, and e-Way Bill.

HDFC Bank NetBanking

SBI NetBanking

BANK RECONCILIATION HIGHLIGHTS

- Universal Bank CSV Parser: Supports statements from HDFC, SBI, ICICI, Axis, and standard NetBanking exports.
- Smart Fuzzy Matching: Compares transaction amounts within a +/- 3 day window and auto-pairs references/UTRs.
- Balanced Variance Tracking: Bank Debits match Book Credits (payments), Bank Credits match Book Debits (receipts).
- Unbooked Charges Detection: Identifies bank SMS charges, service fees, or interest for 1-click ledger posting.
- Audit-Ready Reports: Real-time calculation of Bank Statement Balance vs Book Balance with clear variance status.

05 / DOUBLE-ENTRY LEDGERS & WHATSAPP BOT

Statutory double-entry accounting with real-time balance sheets, P&L, and 2-way WhatsApp bot.

DOUBLE-ENTRY ACCOUNTING & FINANCIAL STATEMENTS

- Automated Journal Entries: Every sale, inward purchase, and payment posts balanced debits and credits.
- Chart of Accounts: Full standard hierarchy covering Assets (1000s), Liabilities (2000s), Equity (3000s), Revenue (4000s), Expenses (5000s).
- Trial Balance: Real-time mathematical verification of total debits vs total credits with difference monitoring.
- Profit & Loss (P&L): Detailed breakdown of Gross Sales, Cost of Goods Sold (COGS), Gross Margin %, and Net Profit.
- Balance Sheet: Continuous verification of the core accounting equation: $\text{Assets} = \text{Liabilities} + \text{Equity}$.

OMNICHANNEL WHATSAPP INVOICE DISPATCH & 2-WAY BOT

- 1-Click WhatsApp PDF Share: Deliver professional branded digital bills directly to customer mobile phones.
- Interactive 2-Way Bot: Customers message your business WhatsApp number with simple keywords:
 - * BALANCE / KHATA -> Returns current outstanding dues and balance.
 - * BILL / INVOICE -> Sends download link for their latest tax invoice.
 - * PAY / UPI -> Generates instant dynamic payment QR link for settlement.
- Cloud Webhook Engine: Built on official Meta WhatsApp Cloud API with real-time delivery status callbacks.
