TABLE OF CONTENTS

- 1. Getting Started: Signup, Login & Store Setup
- 2. Store Profile, Team Roles & GST Tax Configuration
- 3. Product Catalog, Batches & Multi-Godown Stock
- 4. Purchase Inward & GRN (Goods Receipt Note)
- 5. Sales POS Billing & Split Payment Counter
- 6. Thermal Printing & Silent ESC/POS Direct Hardware Driver
- 7. Omnichannel WhatsApp Invoice Dispatch & 2-Way Bot
- 8. Double-Entry Accounting & Financial Reports
- 9. Automated Bank Reconciliation Statement (BRS)
- 10. Statutory GST Compliance (GSTR-1, GSTR-3B, e-Invoice & e-Way)

1. Getting Started: Signup, Login & Store Setup

1.1 Registering a New Merchant Account

Open <https://smartvyapar.vercel.app/signup> in your browser. Enter your Store Name, Owner Name, Mobile Number, and secure password. Select your business type (Automobile, Electrical, Supermarket, Pharma, Restaurant). The system automatically provisions your isolated multi-tenant database and Chart of Accounts.

1.2 Logging In

Access /login anytime. You can evaluate the software using demo@smartvyapar.app and password **SmartVyapar@2026**.

1.3 Business Profile & Statutory GST Details

Go to Settings in the sidebar navigation. Enter your 15-digit GSTIN (e.g.

32AAAAA0000A1Z5). SmartVyapar auto-extracts your state code. Set your default UPI ID (e.g. merchant@icici) to print dynamic payment QR codes on every customer invoice.

RBAC Security: Three distinct roles (OWNER, MANAGER, STAFF/CASHIER) ensure tight cashier control.

2. Inventory, Batches & Multi-Godown Stock

2.1 Products, Barcodes & HSN Tax Codes

SmartVyapar supports standard retail items, batch-tracked goods, and service items. Enter Barcode/SKU, HSN/SAC code, and tax rate (0%, 5%, 12%, 18%, 28%). Units are automatically normalized to DGFT statutory codes (PCS, NOS, KGS, LTR, BOX, CTN, MTR).

2.2 Batch & Expiry Date Tracking

Each incoming batch retains its own Batch Number, Manufacturing Date, Expiry Date, MRP, and Cost Price. The system alerts cashiers when items are nearing 30, 60, or 90 days from expiration.

2.3 Multiple Warehouses & Inter-Godown Transfers

Manage multiple physical storage locations (e.g., Main Godown, Front Shop Counter, Basement Store). Issue inter-warehouse stock transfer notes (ST-YYYY-XXXX) to move inventory with full audit trails.

3. Purchase Inward & Goods Receipt Note (GRN)

3.1 World-Standard Full-Screen Inward Workspace

Navigate to Inventory & Purchases (/inventory/purchase) and click '+ New Inward Bill / GRN'. Select your supplier or click '+ Quick Add' with instant GSTIN lookup. Select the target godown and enter invoice number and date.

3.2 Quick Barcode Scan & Bidirectional Sales Margin Engine

Scan product barcodes or search by name. Enter cost price and selling price to calculate margin automatically. Or type desired margin % to calculate selling price instantly. Use the Bulk Margin Toolbar (15%, 20%, 25%, 30%, 35%) to update all rows in a single click.

3.3 Printing GRN Slips & Barcode Sticker Labels

Press Ctrl+S to save. Click 'Print GRN Slip' for internal audit verification, or click 'Print Barcodes' to generate high-density Code128 barcode sticker labels for your thermal label printer.

AI Camera Scanner: Use Gemini Vision AI on your phone or tablet to scan paper supplier bills into digital GRNs in seconds.

4. Sales POS Billing & Silent Thermal Printing

4.1 High-Speed POS Counter Checkout

Open /billing/new for keyboard-first billing. Press F2 to scan barcodes, Enter to move between rows, F4 for cash, F8 for dynamic UPI QR, and F9 for customer credit (Khata). Press Ctrl+S to finalize the bill.

4.2 Offline-First POS Engine (IndexedDB Local Queue)

If your broadband drops during peak billing hours, SmartVyapar automatically

switches to offline mode via native IndexedDB. The cashier continues billing uninterrupted with temporary offline receipt numbers (OFF-YYYYMMDD-XXXX). All bills automatically sync to the cloud upon reconnection.

4.3 Silent Thermal ESC/POS Direct Hardware Driver

Bypass standard Windows print popups completely. The built-in WebSerial ESC/POS hardware bridge connects directly to 2-inch (58mm) and 3-inch (80mm) thermal printers for instant printing and paper cuts.

5. WhatsApp Invoicing & Double-Entry Accounting

5.1 1-Click WhatsApp PDF Share & 2-Way Bot

Dispatch branded invoices directly to the customer's mobile number via WhatsApp. Customers can also message your business WhatsApp with keywords like BALANCE, BILL, PAY, or MENU to check their outstanding dues or settle via UPI.

5.2 Automated Double-Entry General Ledger

Every invoice, purchase receipt, and payment automatically posts balanced debits and credits into your General Ledger (Assets, Liabilities, Equity, Revenue, Expenses). Real-time reports include Trial Balance, Profit & Loss (P&L), Balance Sheet, and Account Statements.

6. Automated Bank Reconciliation & Statutory GST

6.1 Automated Bank Reconciliation Statement (BRS)

Navigate to /accounting/reconciliation. Upload your bank statement CSV (HDFC, SBI, ICICI, Axis). The AI matching engine automatically reconciles bank debits with book credits within a +/- 3 day window, highlighting exact variances and unbooked charges.

6.2 Official GST Portal Filing (GSTR-1 & GSTR-3B)

SmartVyapar generates 100% compliant GSTN payloads: Table 4 (B2B), Table 7 (B2CS), Table 9B (Credit Notes), Table 12 (HSN Summary with DGFT UQCs), and Table 13 (Document Series). GSTR-3B calculates net output tax liability minus eligible inward ITC.

6.3 Two Government Submission Methods

Method 1 (Portal Offline JSON): Click 'Portal JSON (GSTR-1)' in Invoices and upload the file on gst.gov.in. Tables auto-populate in seconds. Method 2 (Direct GSP 1-Click): Click '1-Click Direct File (GSP)' to file directly via authorized GSP/NIC gateway with official ARN confirmation.

Production Ready: Fully deployed at <https://smartvyapar.vercel.app> with 193 automated passing unit tests.
